

Delivery planned around your operation.

Scheduled routes, STAT needs and healthcare delivery programs begin with a clear scope: locations, volumes, handling and handoffs.

01 Core capabilities

Scheduled medical routes

Recurring pharmacy, laboratory, facility and interoffice route planning.

STAT and same-day needs

Urgent or overflow requests reviewed against route and market availability.

Healthcare deliveries

Specimens, prescriptions, medical equipment and supplies scoped by item requirements.

Handling requirements

Ambient, refrigerated or frozen needs discussed before service is proposed.

02 How we work

Assess the route

Map pickup and delivery locations, windows, stop volume and exceptions.

Agree on handoffs

Define recipient, documentation and proof-of-delivery expectations.

Confirm capacity

Review service area, timing, handling and contingency requirements.

Prepare next steps

Discuss a scoped proposal or a pilot with agreed success measures.

START A ROUTE DISCUSSION

Request a route proposal

Share locations, frequency, estimated stops and handling needs.
